CARATTERISTICHE FEATURES

Rappresentano il massimo qualitativo della produzione SAVE Spa: tubi in acciaio al carbonio saldati a laser per ottenere saldature perfette, vengono successivamente ricoperti internamente ed esternamente con smalto vetroporcellanato cotto a temperatura di 850°C per conferire eccezionali qualità di resistenza alla corrosione delle condense di combustione.

I risultati del test V2 previsto dalla norma 1856-2 sulla resistenza alla corrosione, hanno dimostrato che i canali da fumo Plus 1.2mm e Plus Light hanno una durata decisamente superiore ai normali tubi verniciati di sp. 2mm non vetrificati internamente.

Resistono perfettamente anche a situazioni estreme come il fuoco di fuliggine (incendio che avviene dentro il tubo) senza rovinarsi o alterarsi.

La Dichiarazione di Prestazioni (DoP) n°2 Plus 1,2mm è disponibile sul sito www.savefumisteria.it alla pagina "download", con tutti i riferimenti ai test eseguiti e le istruzioni di montaggio e manutenzione a garanzia di assoluta sicurezza nell'utilizzo.

SUL NOSTRO SITO www.savefumisteria.it SONO DISPONIBILI INFORMAZIONI PIÙ DETTAGLIATE SU OGNI SINGOLO PRODOTTO.

Representing the highest level of SAVE Spa quality, laser-welding ensures these carbon steel pipes perfect welding. Subsequent internal/external vitreous enamel coating baked to 850°C provides exceptional resistance against corrosion by combustion condensate.

V2 test results specified by corrosion resistance Standard 1856-2 show that Plus 1.2 mm and Plus Light flue pipes have a significantly longer duration than normally painted 2 mm thick pipes that have not received internal vitreous enamel coating.

They are perfectly resistant even to extreme situations such as soot-fire (a fire that occurs inside the pipe) without being damaged or modified.

The Declaration of Performance (DoP) n°2 Plus 1,2mm is available at www.savefumisteria.it in the download area, with reference to all the tests performed and Installation and Maintenance Instructions to ensure the greatest safety during use.

MORE DETAILED INFORMATION ABOUT EACH PRODUCTS ARE AVAILABLE ON OUR WEBSITE www.savefumisteria.it

ANTICONDENSA ANTI-CONDENSATE

Per evitare la fuoriuscita di condensa è necessario che vengano montati con l'imbocco rivolto verso il basso (vedi disegno). Per fare questo può essere necessario usare come partenza il raccordo F/F anticondensa.

In order to prevent the leakage of condensate, they must be fitted with the inlet facing downwards (see drawing). To do this, it may be necessary to use an F/F anti-condensate fitting to start with.

GAMMA COLORI COLOR RANGE

Nero opaco
Matt black
Noir mat
Mattschwarz

CARATTERISTICHE FEATURES

Questi tubi sono più leggeri ed economici rispetto alla linea Plus 1,2mm, pur mantenendo tutte le caratteristiche normative e prestazionali. Sono perfettamente compatibili sia dal punto di vista tecnico per imbocchi e dimensioni, sia dal punto di vista estetico per l'uguale finitura in smalto porcellanato. Su questi tubi si possono utilizzare gomiti e T della linea Plus 1,2mm oppure gomiti della linea Classic.

Rappresentano il massimo qualitativo della produzione SAVE Spa: tubi in acciaio al carbonio saldati a laser per ottenere saldature perfette, vengono successivamente ricoperti internamente ed esternamente con smalto vetroporcellanato cotto a temperatura di 850°C per conferire eccezionali qualità di resistenza alla corrosione delle condense di combustione.

I risultati del test V2 previsto dalla norma 1856-2 sulla resistenza alla corrosione, hanno dimostrato che i canali da fumo Plus 1.2mm e Plus Light hanno una durata decisamente superiore ai normali tubi verniciati di sp. 2mm non vetrificati internamente.

Resistono perfettamente anche a situazioni estreme come il fuoco di fuliggine (incendio che avviene dentro il tubo) senza rovinarsi o alterarsi.

La Dichiarazione di Prestazioni (DoP) n°6 Plus Light è disponibile sul sito www.savefumisteria.it alla pagina "download", con tutti i riferimenti ai test eseguiti e le istruzioni di montaggio e manutenzione a garanzia di assoluta sicurezza nell'utilizzo.

SUL NOSTRO SITO www.savefumisteria.it SONO DISPONIBILI INFORMAZIONI PIÙ DETTAGLIATE SU OGNI SINGOLO PRODOTTO.

These pipes are lighter and less expensive than the Plus 1.2mm line, while maintaining all the characteristics and performance standards. They are fully compatible from both the technical point of view - thanks to the same connections and dimensions - and the aesthetical point of view, thanks to the same enamel coating. These pipes can be fitted with Plus 1.2 mm line elbows and tees or Classic line elbows.

Representing the highest level of SAVE Spa quality, laser-welding ensures these carbon steel pipes perfect welding. Subsequent internal/external vitreous enamel coating baked to 850°C provides exceptional resistance against corrosion by combustion condensate.

V2 test results specified by corrosion resistance Standard 1856-2 show that Plus 1.2 mm and Plus Light flue pipes have a significantly longer duration than normally painted 2 mm thick pipes that have not received internal vitreous enamel coating.

They are perfectly resistant even to extreme situations such as soot-fire (a fire that occurs inside the pipe) without being damaged or modified.

The Declaration of Performance (DoP) n°6 Plus Light is available at www.savefumisteria.it in the download area, with reference to all the tests performed and Installation and Maintenance Instructions to ensure the greatest safety during use.

CARATTERISTICHE FEATURES

I tubi smaltati SAVE sono prodotti con lamiera di acciaio rivestita con smalto porcellanato tramite un procedimento che prevede la cottura del pezzo a ben 830°C.

Lo smalto porcellanato rende questo tubo preferibile ad ogni altro per alcune caratteristiche:

- resistenza alle più alte temperature di esercizio: T600, la classe più alta secondo la EN 1856-2
- resistenza allo sbalzo termico
- resistenza alla corrosione da condensa certificata dal superamento del test V2 che li rende idonei all'utilizzo con qualsiasi tipo di combustibile: solido, liquido e gassoso
- resistenza all'abrasione e agli agenti chimici: sono lavabili con qualsiasi solvente o prodotto per la pulizia.
- tenuta ai gas della combustione (tiraggio naturale)
- qualità estetica: i colori non si alterano con l'uso o con le alte temperature

La Dichiarazione di Prestazioni (DoP) n°1 Classic è disponibile sul sito www.savefumisteria.it alla pagina "download", con tutti i riferimenti ai test eseguiti e le istruzioni di montaggio e manutenzione a garanzia di assoluta sicurezza nell'utilizzo.

SUL NOSTRO SITO www.savefumisteria.it SONO DISPONIBILI INFORMAZIONI PIÙ DETTAGLIATE SU OGNI SINGOLO PRODOTTO.

The SAVE vitreous enamelled pipes are made of sheet steel coated with vitreous enamel and baked at 830°C.

The vitreous enamel coating makes this pipe better than any other pipe thanks to some of its features:

- resistance to the highest working temperatures: T600, the highest class according to EN 1856-2
- resistance to any changes in temperature
- resistance to condensate corrosion certified by the outcome of the V2 test for qualification for use with any type of solid, liquid or gas fuel.
- resistance to abrasion and chemical agents; they can be cleaned with any solvent or cleaning product
- combustion gas-tight (natural draught)
- aesthetic quality: colours do not alter with use or as a result of high temperatures

The Declaration of Performance (DoP) n°1 Classic is available at www.savefumisteria.it in the download area, with reference to all the tests performed and Installation and Maintenance Instructions to ensure the greatest safety during use.
